

## INTERNSHIP Opportunity

**Description of Organisation:** Water Stewardship Vietnam (WSVN) is an initiative by Water Stewardship Asia Pacific (WSAP) that support the implementation of water stewardship principles in the Asia Pacific Region. Water stewardship principles promote the sustainable governance of water resource by major water users (industrial, agricultural, commercial and institutional) through socially inclusive processes, by engagement with communities and stakeholders, is culturally appropriate, and delivers positive outcomes at site and catchment scales.

WSVN is building an ecosystem of water-conscious users working on solutions to address the water and climate change challenges in Vietnam. We support the collaborations of industry and local government that will help to enhance water security in Vietnam.

**About the Position:** We are looking for a part-time Intern based in Vietnam (HCMC preferred) to support our activities. The position will support the Program Manager and other team members in different activities to ensure the successful implementation of the program and report directly to Project Manager.

**Internship description:**

- Teamwork to brainstorm new ideas, contribute ideas for event planning & organizing, and program development (surveys, workshops, training courses, events...)
- Support the facilitation of workshop and ongoing programs
- Conduct desk research on catchment/catchment risks

- Support the development of water management resources in Vietnamese
- Research on any other subject matter that is relevant in response to work demand
- Undertake any other tasks as assigned by the Program Manager.

**Requirement**

- Environmental science, management or engineering, and/or social sciences or education students with an interest in social and environmental sustainability.
- Bachelors' degree or higher in environmental science, engineering, business administration or related field
- Excellent communication, presentation, and teamwork
- Strong passion for sustainability issues and trends
- Fluency in English and Vietnamese

**Period & duration of internship:**

Four to six months, part-time, 7.6 to 22.8 hours (1-3 days) per week, depending on intern availability and length of internship. Minimum 80 total hours.

**Location of internship:**

Remote/online. Desk-based from own/home office.

**Employability skills and capabilities preferred:**

Good research, organisational and communication skills. Able to work autonomously and collaborate with team members and stakeholders (government, industry, First Nations, civil society, academic, etc) in an online environment.

**Benefits**

The intern will have great opportunities to work and learn in an exciting environment with a global team that have positive water and

the environment sector in Vietnam. Intern will receive a monthly allowance for the internship duration.

**How to Apply:**

Please send your Workable application via **[waterstewardshipvietnam@gmail.com](mailto:waterstewardshipvietnam@gmail.com)**
